Liquor Monitoring

BarVision

the easy way to Build a Better Bar™

With BarVision's SmartSpouts™, you finally have the power to see what's really happening at your bar anywhere, anytime. BarVision is a wireless liquor and beer monitoring system that helps you increase bar revenue through higher yields and increase bar profits by reducing costs. Combining real-time pour data and POS connections in a cloud dashboard, you have everything you need to increase control, increase revenues, and increase profits at your bar.

Bar owners and executives are discovering the benefits of BarVision's patented smart pour system and seeing double digit increases in revenue per bottle, smoother operations with better trained staff, and a total ROI that commonly approaches 15X your investment.
